

Digital Services

Our values for successful projects

- Long term perspective & entrepreneurial responsibility
- Common sense
- Down-to-earth & pragmatic
- Sustainable growth
- Enjoyment of challenges
- Innovation as a driving force

You, as our customer, are our central focus. Your satisfaction is our driving force!

The owner managed family business DRÜCKER Steuerungssysteme GmbH has been a symbol of innovation in the middle-class sector for almost 40 years. With the programming of digital services in the industrial environment we have established ourselves as a leading company.

Our headquarters are located in Neuhausen auf den Fildern near Stuttgart. A total of approximately 50 employees are dedicated to the success of our owner-managed company.

1985 Established by Uwe DRÜCKER

1995 Wonderware System Integrator

2012 AVEVA Endorsed Partner

2013 Schneider MSX/Alliance Partner

50 Employees

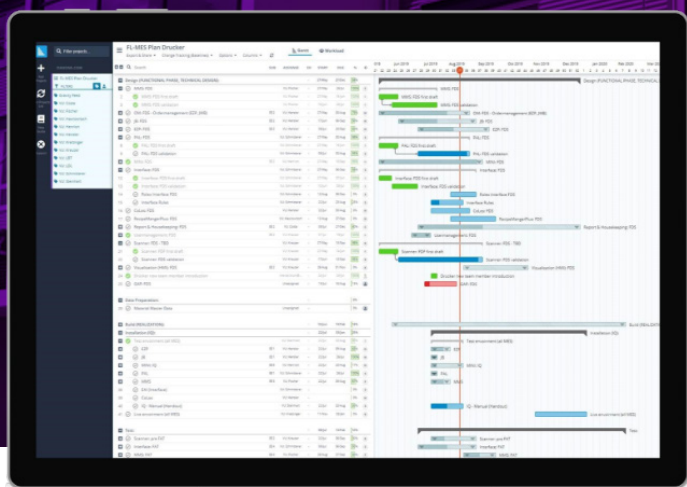

26 AVEVA Certified Application Engineers & Developer

Expertise for industry-specific solutions

With our extensive expertise and years of experience, we provide valuable support to customers across diverse industries in their international projects:

- Semiconductor
- Building control technology
- Food & Bev
- Pharma & Medicine
- Renewable energy
- Infrastructure
- Smart city
- Energy
- Plant construction
- Fully automatic car parking systems
- Conveyor technology
- Retrofit of machines & plants

Specialist in the Development of Digital Solutions within the Industrial Environment

- Process control systems for plant construction, buildings & process technology
- Cloud solutions, Traceability App, MES, Industry 4.0, FAMS
- Engineering for automation technology & digital services
- Programming of PLC controls
- Partner for global group solutions
- 24/7 service

Our solutions

Shop Floor-IT

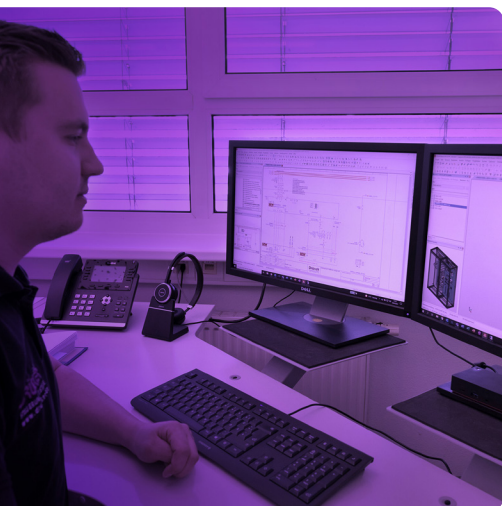

DRÜCKER Steuerungssysteme offers a comprehensive portfolio of industrial software solutions that support companies on their path to increased efficiency and productivity. Whether used individually or integrated with each other, our Shop Floor IT software represents a scalable approach that allows you to start small and expand as needed.

Smart Notification Software

With WIN-911, you have your production under control. In case of any error notifications in your operations and equipment, you will be promptly informed, allowing you to react proactively. This helps to prevent production downtime and minimizes scrap, ensuring optimal efficiency and product quality.

Industry 4.0

Optimize your productivity and increase production efficiency with our innovative Cloud Solution! Our software enables precise acquisition of process and operational data, including recipe management, traceability, and SAP integration. This guarantees complete transparency in your production processes. With our SCADA system, gain real-time insights into the status of your plants and machines. Stay informed about potential disruptions and problems through our Smart Notifications. Additionally, our comprehensive reporting tool provides valuable insights to optimize your Overall Equipment Efficiency (OEE). Take the next step to boost productivity and confidently rely on our Cloud Solution!

Manufacturing Execution Systems

DRÜCKER Steuerungssysteme offers a software solution that monitors production processes in real-time, thereby improving efficiency and product quality. It provides real-time dashboards for quick decision-making and seamlessly integrates with other business systems for enhanced information flow.

Industrial Automation

As a versatile engineering service provider in the field of Industrial Automation, we offer our clients a wide range of expertise to address diverse challenges. From technical design and our own control cabinet construction to commissioning by experienced service technicians and PLC programmers, we provide integrated solutions for complex and global projects across various industries. We prioritize the highest quality standards and strive for maximum flexibility in meeting our customers' need.

Infrastructure & Facility Management

DRÜCKER Steuerungssysteme specializes in Infrastructure & Facility Management. We provide the Facility Asset Management Suite, an advanced application package for state-of-the-art control center solutions in buildings, facilities, energy, and process engineering systems. Built on the AVEVA System Platform's generic object model, our highly scalable solution offers exceptional capabilities. Our custom incident management system ensures that operators and service providers receive immediate notifications of critical information through various channels, including VoIP, email, chat messages, and more.

Enterprise Asset Management

DRÜCKER is the official implementation partner of the IFS Ultimo EAM Cloud platform in Germany. By leveraging this software solution, companies benefit from increased productivity and minimized downtime. Maintenance processes are simplified and streamlined, enabling cost control and reduction. This makes businesses more resilient to future challenges and allows them to efficiently harness their collective expertise.

Excellent service at all times

DRÜCKER Steuerungssysteme offers excellent 24/7 service to ensure smooth operation of your systems with minimal downtime anytime and anywhere.
